# 2025 Pediatric Pharmacology Update

**SEPTEMBER 26, 2025**

# About

Join us for this year's **Pediatric Pharmacology Update!** This virtual conference brings together a panel of experts who will provide updates on the most recent pharmacological management strategies for a broad spectrum of pediatric diseases and health issues. Topics will include GLP 1's, NICU topics, a migraine medication update, and an antibiotic update. This is an excellent opportunity for healthcare team members to stay abreast of the latest developments in pediatric pharmacology. We look forward to your participation. Register today!

## PROGRAM OBJECTIVES

At the conclusion of this program, participants should be able to:

- Identify and describe the latest advancements in pharmacological treatments for common pediatric conditions, including new drug approvals, updated guidelines, and emerging therapies.
- Learn strategies to enhance medication safety in pediatric populations, focusing on dosage calculations, adverse drug reactions, and the implementation of best practices to minimize medication errors.
- Apply evidence-based practices in clinical settings, utilizing the most current research and trends to inform their prescribing decisions and improve patient outcomes.
