

# Agenda

FRIDAY JUNE 5, 2026

Bridging Exercise Science and Clinical Medicine:  
Importance of Exercise immunology in Building Health  
Resilience Against Cardiovascular Diseases

## REGISTRATION & BREAKFAST

7:30 a.m. Registration & Breakfast

## WELCOME

8:30 a.m. **Welcome and Introduction**  
Takeshi Tsuda, MD, FAAP, FACC

## Session 1 | Exercise Immunology in Human Health

Moderator: Takeshi Tsuda, MD, FAAP, FACC

8:40 a.m. **Can Exercise Boost the Immune System? Implications for Health and Disease**  
Brian Timmons, PhD

## Session 2 | Cardio-Oncology, Emerging New Area of Clinical Significance

Moderator: Douglas Harrison, MD

9:20 a.m. **Current Trend of Childhood Cancer Survivors and their Future**  
Kimberly Davidow, MD

9:35 a.m. **Exercise may prevent cancer treatment related cardiovascular toxicity by multiple mechanisms**  
Keri Shadler, PhD

10:10 a.m. **Occult Cardiovascular Toxicity in Childhood Cancer Survivors**  
Juan Carlos Plana, MD

10:50 a.m. **Coffee Break**

## Session 3 | Exercise and Stress Imaging Studies: Better Understanding of Cardiovascular Reserve and Early Recognition of Subclinical Myocardial Pathology

Moderator: Simon Lee, MD

11:10 a.m. **Significance of Stress Imaging for Patients with Pediatric and Congenital Heart Disease**  
Mark Cartoski, MD

11:30 a.m. **Treadmill or Tesla? Rethinking How We Stress the Heart**  
Simon Lee, MD

# Agenda

FRIDAY JUNE 5, 2026

Bridging Exercise Science and Clinical Medicine:  
Importance of Exercise immunology in Building Health  
Resilience Against Cardiovascular Diseases

## Session 3 | Continued

12:00 p.m.	<b>The Role of Exercise in Pediatric Heart Failure and Cardiomyopathies</b> Jonathan Edelson, MD, MSCE, FACC
12:30 p.m.	<b>Case Discussions</b> Simon Lee, MD, Mark Cartoski, MD, Jonathan Edelson, MD, Mark Gormley, MD
1:00 p.m.	<b>Lunch Break</b>

## Session 4 | Cardiopulmonary Exercise Testing in Adult Congenital Heart Disease: Different Viewpoints from Pediatric and Adult Cardiologists

Moderator: Bradley Robinson, MD

1:50 p.m.	<b>Cardiopulmonary Exercise Testing in Adult Congenital Heart Disease: From Physiology to Prognosis to Prescription</b> Guillermo Torres Viera, MD
2:10 p.m.	<b>Making Every Fontan Super: Optimizing Resilience in Single Ventricle Physiology</b> Kristian Becker, MD
2:30 p.m.	<b>Bridging the Gap: Insights into Adult Exercise Stress Testing</b> Yaqub Betz, MD

## Session 5 | Case Discussion of Adult Patients with Congenital Heart Disease

Moderator: Takeshi Tsuda, MD

2:50 p.m.	<b>ACHD Case Presentation and Discussion</b> Guillermo Torres Viera, MD, Kristian Becker, MD, Yaqub Betz, MD and Wolfgang Radtke, MD
4:00 p.m.	<b>Closing Remarks</b>
